

## Four Valve Irrigation Controller

Stand-alone battery driven irrigation controller timer with a G75 2W/NC 9VDC latch coil connected. Powered by a single 9V battery. Can operate any valve equipped with 3/4" UNEF solenoid cavity (Richdel type).

Ideal for Greenhouses, gardens, turf, balconies & hanging baskets.

### Features

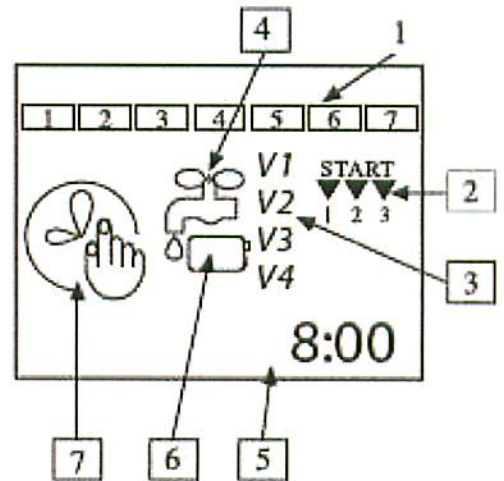

Connects to FOUR separate valves and master valve.

Up to three operations per day.

Easy installation and programming

Water proof & weather resistant

Various mounting options:  
On valve and wall.

### PROGRAMMING THE CONTROLLER

The irrigation program must be set for each valve separately:

V1 = Valve 1

V2 = Valve 2

V3 = Valve 3

V4 = Valve 4.

Each valve may be set with a different DURATION time, different START selects and different DAYS of operation.

### Meaning of Icons

1. Irrigating days of the week
2. Program starts
3. V1 = Valve 1  
V2 = Valve 2  
V3 = Valve 3  
V4 = Valve 4
4. Irrigation
5. Timing or clock
6. Low battery
7. Time adjustment
