

High Flow Diaphragm Hydraulic Control Valve

P Main Features and Benefits

- Unique NON METAL WETTED PARTS valve.
- Glass reinforced Nylon valve body and cover injection.
- Super straight flow with minimum head loss.
- Simple and reliable 3 parts valve body, cover and unique patented diaphragm.
- Self contained "spring less" patented diaphragm guarantees uniform pressure distribution on sealing area, prevents diaphragm deformation and ensures maintenance free performance.
- No Plastic or metal moving parts.
- Wide connection options, Thread, Flange and "relaxed" Grooved.
- Valve body construction allows boltless fixation of one or two control pilots.
- Valve smoothly operates in wide range of pressure and flow, prevents noise and vibrations.
- Very low opening and drip tight closing line pressure.
